Support ▾

### Cloud enable your app

- 1 Create a project
- 2 **Select app platform**
- 3 Set up your backend
- 4 Connect to your backend

### Select app platform

Add AWS cloud services to your app. Select a platform:

  
iOS

  
Android

  
Web

  
React Native

Analytics | Resources

### User Sign-in

Let your users sign in with public identity providers or your own identity system.

Powered by Amazon Cognito

### NoSQL Database

Store data in a fully managed cloud database.

Powered by Amazon DynamoDB

### Cloud Logic

Run your business logic in the cloud.

Powered by Amazon API Gateway and AWS Lambda

### User File Storage

Store files in the cloud.

Powered by Amazon S3

### Hosting and Streaming

Host web apps, deliver files, and stream media from our global network of edge servers

Powered by Amazon S3 and Amazon CloudFront

# AWS Mobile CLI: Setting up Cloud Services

## AWS Mobile Hub Console

# AWS Amplify Library

## Authentication

AuthN, AuthZ, OIDC  
JWT, MFA

## Analytics

Single line  
integration with  
Amazon Pinpoint

## API

RESTful APIs with  
Amazon API  
Gateway

## Storage

Upload, Download,  
list content in S3

## Caching

LRU cache  
interface across  
web apps and  
React Native

Push notifications with  
support for Amazon  
Pinpoint campaigns and  
targeting

# Using Amplify To Connect your App

```
1 import React from 'react';
2 import { StyleSheet, Text, View } from 'react-native';
3 import Amplify, { I18n, withAuthenticator } from 'aws-amplify-react-native';
4 import awsExports from './aws-exports';
5
6 Amplify.configure(awsExports);
7 I18n.setLanguage("fr");
8
9 class App extends React.Component {
10   render() {
11     return (
12       <View style={styles.container}>
13         <Text>Open up App.js to start working on your app.
14         <Text>Changes you make here are reflected in the simulator.
15         <Text>Shake your phone to turn on the simulator.
16       </View>
17     );
18   }
19 }
```

Higher-order components enable a functional sign-in UI with just two lines of code!

# Building Bots For Your Apps Using AWS

Build a bot on Amazon Lex easily

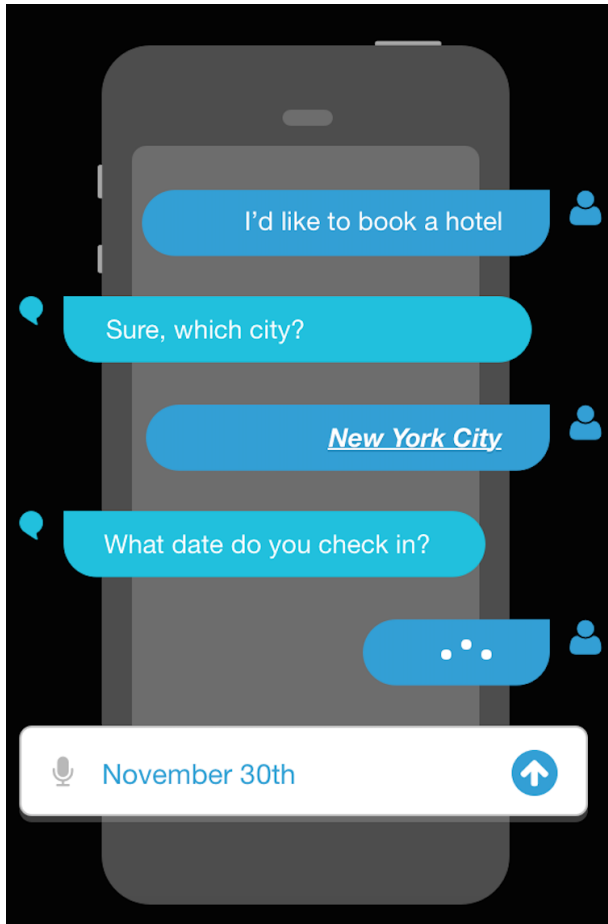

Save development time and effort using Mobile Hub components and samples

Invoke existing business applications or SaaS applications using connectors in Mobile Hub

# Amazon Lex Bot Structure

## BookHotel

## Intents

An Intent performs an action in response to natural language user input

## Utterances

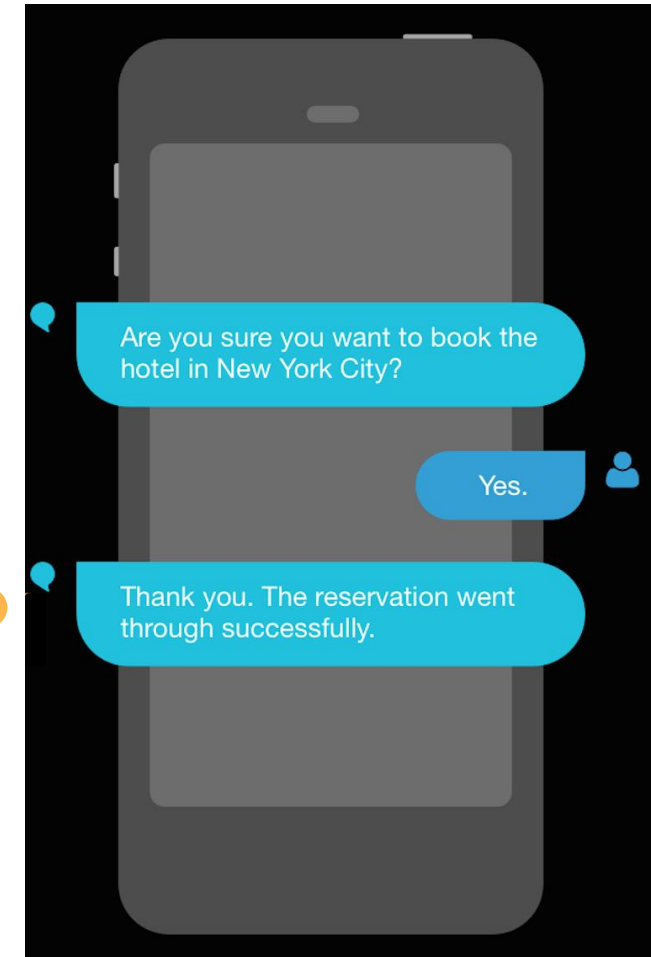

Spoken or typed phrases that invoke your intent

## Slots

Slots are input data required to fulfill the intent

## Fulfillment

Fulfillment mechanism for your intent

# AWS Mobile Hub

My Sample App	
	<b>User Sign-in</b> Let your users sign in with public identity providers or your own identity system.
	<b>Push Notifications</b> Send push notifications to individuals or groups of users.
	<b>App Content Delivery</b> Store and distribute media assets and other files.
	<b>User Data Storage</b> Store files for your users in the cloud. Store and sync user data in key/value pairs.
	<b>App Analytics</b> Collect app usage information and analyze key metrics.
	<b>Cloud Logic</b> Run backend code in the cloud.

## Working mobile app project includes:

- ✓ XCode or Android Studio project
- ✓ Uses your AWS resources
- ✓ Example application code
- ✓ Helper code
- ✓ Software development kits
- ✓ Detailed integration instructions

# Developer Challenges With App Data

Data requirements vary across devices and become harder when multiple users share data

Users want instant access to data

Users want to continue using their apps even with low or no connectivity

Building scalable data-driven apps without learning distributed systems concepts is hard

# Introducing

# AWS AppSync

# Build Powerful Data Driven Apps With AppSync

Real-time  
Collaboration

Offline  
Programming  
Model with  
Sync

Get Only the  
Data You Need

Access Data  
from Multiple  
Sources

Fine-grained  
Access Control

# What Can You Build With AppSync?

## Real-time and Collaboration Apps

- Dashboard
- Leaderboard
- Field service apps

## Social Media, Chat and Dating Apps

## Geo Apps

## Apps with Complex Data Structures and Types

# How does AWS AppSync work?

# Phases Of A Mobile Application

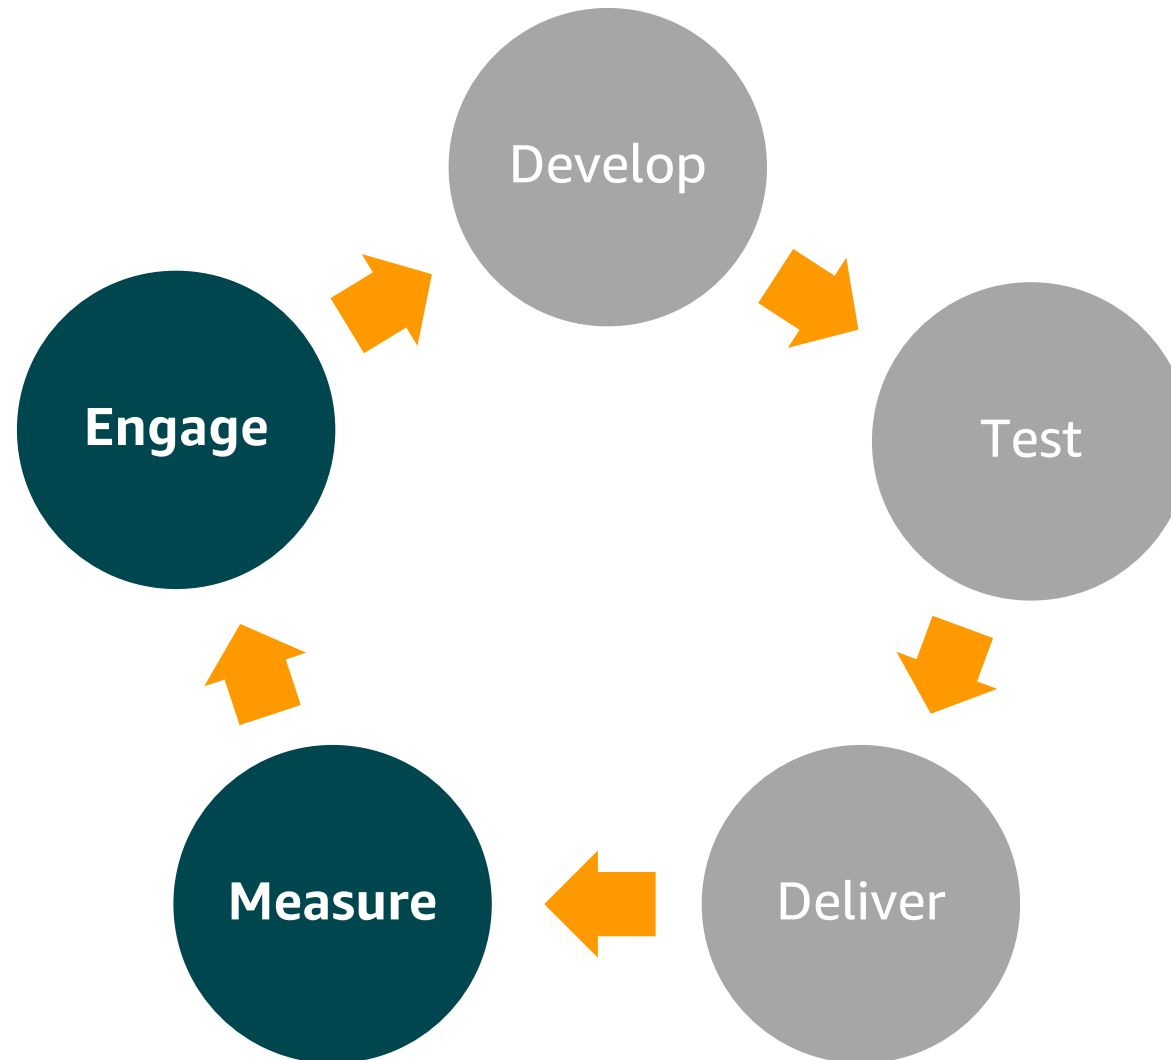

# AWS Device Farm – Test On Real Devices

# Continuously Deliver Quality Applications

# Phases Of A Mobile Application

# Generate Insights To Drive Informed Decisions

Analytics on usage,  
retention, and  
monetization

Flexible app  
instrumentation  
and custom  
analytics

Integrated mobile  
and web analytics

# Welcome to Amazon Pinpoint

Use Amazon Pinpoint to understand and engage with your app users. Amazon Pinpoint helps you understand app user behavior, define who to engage, determine which notifications to send, decide when to deliver the notifications, and track the results of your campaign.

## Measure engagement

Analyze app user behavior and improve campaign performance

## Segment your user base

Define segmentation criteria for campaigns and analytics based on usage, device, and custom attributes

## Create custom messages

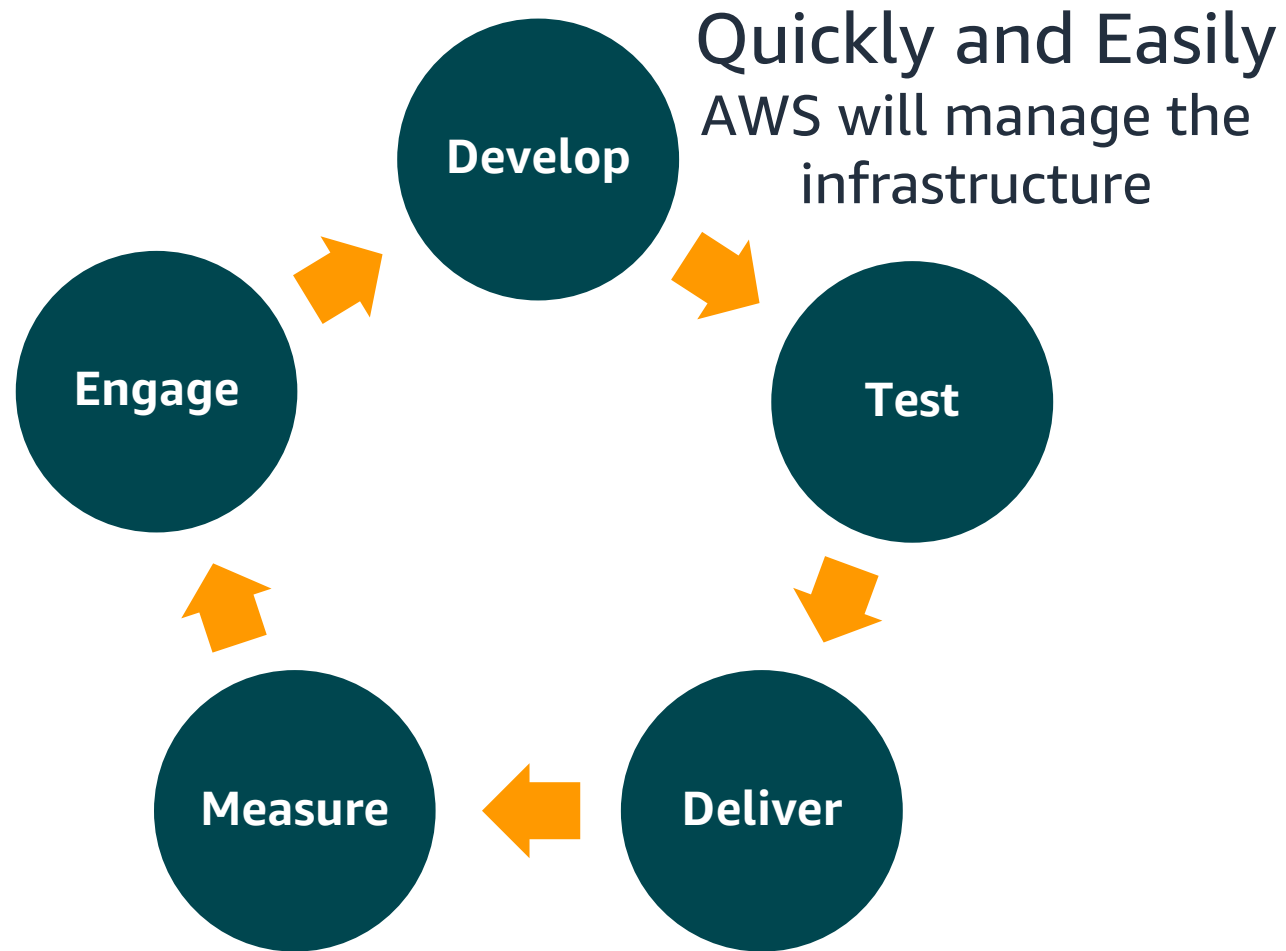

Create custom push notifications for your campaigns

# With deep expertise on AWS, APN Partners can help your organization at any stage of your Cloud Adoption Journey.

## AWS Managed Service Providers

APN Consulting Partners who are skilled at cloud infrastructure and application migration, and offer proactive management of their customer's environment.

## AWS Competency Partners

APN Partners who have demonstrated technical proficiency and proven customer success in specialized solution areas.

## AWS Marketplace

A digital catalog with thousands of software listings from independent software vendors that make it easy to find, test, buy, and deploy software that runs on AWS.

## AWS Service Delivery Partners

APN Partners with a track record of delivering specific AWS services to customers.

Ready to get started with an APN Partner?  
Find a partner: <https://aws.amazon.com/partners/find/>  
Learn more at the AWS Partner Network Booth

# Thank You for Attending AWS Innovate

We hope you found it interesting! A kind reminder to **complete the survey.**

Let us know what you thought of today's event and how we can improve the event experience for you in the future.
